

# **Instructor's Class Plan for Super Simple Quilt Wall Hanging**

**From *Super Simple Quilts #1* with Alex Anderson & Liz Aneloski**

## **CLASS DESCRIPTION:**

This class is perfect for beginners to make their first quilt or for more advanced quilters who want to make a quick gift. Choose a wallhanging-size quilt from the three simple projects in *Super Simple Quilts #1*—all the quilts in the same book use the same supply list! Only simple, straight sewing is required. These simple quilts really showcase the six fabulous fabrics you will choose.

**Note:** The Materials and Cutting lists in the book include 3 quilt sizes: wall/crib, twin, and queen. If your students like the quilt they make in class, they can also make coordinating quilts in the larger sizes.

## **APPROXIMATE CLASS TIME:**

**For beginners (allows extra time for slower sewing and to teach basics):**

- Two 3-hour sessions to create a finished or nearly finished quilt top (*Twist and Turn* requires a bit more piecing time).
- One more 3-hour class to learn the 3 layer-securing methods and 3 binding techniques.

**For more experienced quilters (less time for basic instruction):**

- One 3-hour class to create a finished or nearly finished quilt top (*Twist and Turn* requires a bit more piecing time).

## **WHAT EACH STUDENT WILL GET:**

Each student should leave class with a finished or nearly finished quilt top. What a great accomplishment!

## **PROJECT SUPPLIES:**

- Required text: *Super Simple Quilts #1 with Alex Anderson & Liz Aneloski*
- 6 different fabrics:
  - 1 light: 1/2 yard
  - 3 mediums: 1/2 yard each
  - 2 darks: 5/8 yards each
- Basic rotary cutting and sewing supplies

## **ADVANCE PREPARATIONS:**

**Make a sample of the quilt to hang in the shop to help generate interest in the class and the book.**

## **DURING THE CLASS:**

- 1. Go over the information in The Basics chapter (pages 4-11). For a beginning audience, demonstrate how to rotary cut. Give guidance for stitching, pinning, and pressing.**
- 2. Follow the project instructions for your chosen project.**
- 3. At the end of the session, go over the three layer-securing methods and three binding techniques.**
