TOTES AMAZEBALLS

Fussy Cutting and Improvisational Patchwork

From *Fussy Cutters Club*By Angie Wilson

Class Description:

This class makes the perfect introduction to fussy cutting and improv patchwork. Students will learn how to fussy cut motifs for maximum impact in improvisational patchwork. If there is time, students will also learn basic walking-foot quilting. Participants will leave the class with a finished tote. Project can be found on page 99 of *Fussy Cutters Club*. Intermediate skill level.

Please note: for students to finish this project within the class time frame, they may need to skip the quilting stage of the project construction.

Class Length:

Full-day class. Alternatively, class can be split into 2 shorter classes (make the tote panels in one class and return for second class on how to construct the tote).

Class Supply List:

Mandatory Supplies:

- Fussy Cutters Club by Angie Wilson
- Sewing machine
- Sewing machine manual
- Walking foot
- · Jeans sewing machine needle
- Basic sewing supplies: rotary cutter, ruler, cutting mat, seam ripper, fabric pen, cotton thread, scissors, spare machine needles
- Fabric:
 - Assorted fussy-cut fabrics totaling 1 yard
 - ¼ yard, 55"–60" wide vinyl for the bottom of the tote (alternatively students might like to use canvas)
 - 1 1/3 yards fabric for the lining
 - ¾ yard backing (can use flannel for added bag strength)
 - ¾ yard batting
 - ¼ yard fabric for handles
 - o 1 ½ yard, at least 30" wide medium-weight interfacing

Optional Supplies:

· Alternative fabric options for the bottom of the bag

- From Marti Michell Perfect Patchwork 6.5" Fussy Cut Ruler
- · Flatter by Soak
- · Notions and books on quilting your projects

TIP: This is the perfect opportunity to walk students through different types of fussy cut fabrics, directional fabric, and complementary fabrics. Use fabrics from within the shop to show students the wide range of printed fabrics and how to select prints that complement and do not compete with their fussy cutting. A great opportunity to sell panel motifs to students for use.

See Cloth Tales chapter (p. 13) of *Fussy Cutters Club* for information about fabric selection.

Classroom Preparation:

Supplies for Communal Use:

- · Ironing board, iron, and starch
- Large cutting mat
- Large ruler
- Design wall

Class Preparation:

- Have at least 3 fabric bundles made up from your store that show different scale
 motifs and complementary fabrics. Use this as an opportunity to show students
 how they can use a complete fabric line by fussy cutting select prints in the line
 and complementing these with the blenders in the line. See Cloth Tales chapter
 (p. 13) of *Fussy Cutters Club* for information about fabric selection. This is a
 great opportunity to sell your stock to your students.
- Prepare examples of the project using different fabric combinations. Use these
 examples to show how using directional prints and ditzy prints can make different
 impacts on the design. These examples can also show how the improvisational
 patchwork can be used with a limited color palette or one designer fabric line to
 make an impactful tote.
- Prepare an example of a quilt sandwich to show students this technique.

Class Agenda:

 Welcome Students. Introduce yourself to the class—provide a brief history of your sewing skills and experience with fussy cutting. Have students introduce themselves and provide some insight into their experience with fussy cutting, what skills they're hoping to learn during the class, and any concerns they have in relation to fabric selection and fussy cutting.

- 2. **Discuss Fabric Selection for Fussy Cutting.** Provide students with examples of fabrics that can be used for fussy cutting with this project. Show alternative examples of how the project can be made to look with different fabrics.
 - a. See Cloth Tales chapter (p. 13) of *Fussy Cutters Club* for information about fabric selection.
- Discuss Fussy-Cutting Techniques. Provide students with examples of how to isolate and highlight print motifs in their work. Talk about how seam allowance impacts fussy cutting. Discuss the options of motif placement within improvisational patchwork.
 - a. See Tools of the Trade chapter (p. 23) of *Fussy Cutters Club* for information about possible tools that can be used with fussy cutting.
 - b. See How to Be a Fussy Cutter chapter (page 35) for information about how to fussy cut.

4. Make the Project.

- a. Use the project pattern on page 99 of *Fussy Cutters Club* to make the project.
- b. Remind students about where seams will fall in the tote construction so they don't cut off prized fabrics.
- c. Please note: for students to finish this project within the class time frame, they may need to skip the quilting stage of the project construction.
