Yardage Table

If you are using the same backing fabric for multiple blocks, you can use the yardage chart to determine how much yardage you'll need. When using the chart, keep in mind it is based on 40"-wide fabric. If your fabric is wider, you might need less fabric. The chart also adds 1/8 yard to the measurements, which will allow for potential shrinking if you wash the fabric and to straighten out the edge before cutting. You might want to purchase more fabric, particularly if you need many strips, in case you cut a strip inaccurately.

The chart takes you up to 18" finished blocks, which require 20" x 20" background squares. Beyond 20", you'll only fit one block per strip (for 40" fabric). Multiply the background cut size by the number of blocks you need and divide by 36" to calculate your yardage.
