Errata for

Hooked on Tapestry Crochet #11652

All Versions

Understanding Patterns, Page 40: A new note was added for left-handed crocheters. Please see the attached PDF for details.

Understanding Patterns

The crochet patterns in this book are designed to be easy to follow, whether you prefer written instructions or visual graphs. This section explains the abbreviations, pattern key, graph layout, and how to read both the written and charted patterns.

ABBREVIATIONS

For simplicity, this book uses standard US crochet abbreviations. Here are the ones you'll see most often:

- **CH:** chain
- **SC:** single crochet
- **ST:** stitch
- **SL ST:** slip stitch
- **RS:** right side of tapestry
- **WS:** wrong side of tapestry

UNDERSTANDING THE GRAPH

All of the tapestry patterns in this book are shown as color-coded charts (graphs). Each square represents one single crochet stitch.

How to read the graph:

- **ROWS:** Start from the bottom row and work upwards.
- **RIGHT SIDE ROWS:** Read from right to left (the graph has the row number on the right side for the RS rows).
- **WRONG SIDE ROWS:** Read from left to right (the graph has the row number on the left side for the WS rows).
- **COLOR CHANGES:** Each square's color shows which yarn to use for that stitch.

TIP Mark rows with a sticky note or pencil as you go to keep your place.

A NOTE FOR LEFT-HANDED CROCHETERS Because left-handed crocheters work in the opposite direction, please reverse the chart reading directions as follows:

ROWS INSTRUCTED AS RIGHT SIDE: Work left to right • **ROWS INSTRUCTED AS WRONG SIDE:** Work right to left

Reversing your chart in this way ensures the design stays identical. *(Note: You can follow the written row-by-row instructions, too. To do this, read and follow the instructions in reverse from right to left. For example for Leaflight: ROW 3 [RS]: B9, L1, B10 you would work B10, L1 and then B9).*
